Zero Waste Strategy

Circular management

Waste management

Best option

Reduce, rethink, redesign

Reduce the resources being used and redesign to avoid producing waste.

Reuse, repair, repurpose

Keep things in use for as long as possible, without significant reprocessing.

Decision to dispose

Recycle, compost, anaerobic digestion

Process materials to make the same or different material of similar value when reuse is no longer possible.

Recover value

Recover any remaining value, sustainably and without increasing emissions (eg chemical recycling, renewable energy).

Dispose

For any truly residual waste, treat to remove or reduce potential harm before final disposal.
