Mā te mahi tahi
Driving impact through
collaboration

18-21 May 2026 \\ TSB Arena & Shed 6, Wellington

Nic Quilty

Chief Executive
WasteMINZ

Matt Potter

Chief Executive
ALGA

welcome

Welcome to the WasteMINZ & Australasian Land and Groundwater Association (ALGA) 2026 conference. We are delighted to be delivering this event together and are proud to be bringing the conference theme to life: **Mā te mahi tahi - Driving impact through collaboration.**

Wellington is the perfect destination for this joint conference, with the general election taking place in November. Expect a lively political panel, moderated by the wonderful Bernard Hickey, a financial and political commentator, who will also be a keynote at the conference.

The programme has been months in the making and reflects the depth and breadth of the waste, resource recovery, and contaminated land and groundwater sectors. It includes over 120 presentations, six keynotes, nine panel discussions, a collaborative session, four workshops, two site visits, an Awards for Excellence session, a gala dinner and two networking events. Thank you to those of you who submitted abstracts for presentations, agreed to be on panel discussions, developed workshop content (there are three working groups), and approved site visits. You made the programme what it is – diverse and filled with numerous opportunities to challenge the status quo, increase knowledge, explore new ideas, and celebrate excellence.

For those of you who are sponsoring and exhibiting at the conference. Thank you! We recognise you will be sponsoring and exhibiting for various reasons, and we are committed to providing you with the best experience possible!

Registrations have been flooding in, and we are expecting 600 to 650 delegates representing consultancies, central and local government, construction and demolition operators, community organisations, equipment manufacturers, food rescuers, laboratories, landfill operators, waste and recycling operators, local government, material recovery facilities, packaging manufacturers, researchers, academics, retailers, waste educators, and zero waste advocates. If you have already registered, thank you for choosing to be part of this conference. We know you have many choices of where to spend your ever-tightening budgets.

We are looking forward to seeing you all at the inaugural WasteMINZ ALGA 2026 Conference.

Ka kite ākuanei,

WASTEMINZ ALGA CONFERENCE APP - EVENTIFY

This year, all the information for the WasteMINZ ALGA Conference 2026 will be hosted in the Eventify app. Just download Eventify on the App Store or the Google Play store. Once you've downloaded the app, search for WasteMINZ or ALGA.

We'd encourage you to upload a profile pic, and ensure your profile is public so you can share your contact details with other conference delegates and message each other easily.

Here are some highlights of what you can do with this app:

- Learn about our speakers, sponsors and exhibitors.
- See who else is attending, and message, book meetings and share your contact details with them.
- Easily find the rooms your preferred sessions are located in.
- Access our full programme, including information about each presentation in the sessions.
- Ask questions of our keynote speakers.
- Give feedback on keynotes, speakers, panels and workshop sessions.
- Bookmark your favourite sessions, write notes and export them easily.
- Vote for the Best Expo Site.
- Read how-to info for using the app.
- Go in the draw to win one of three spot prize vouchers for simply engaging with the app!

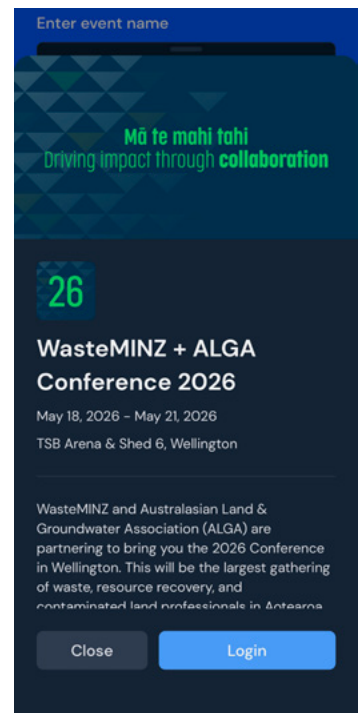

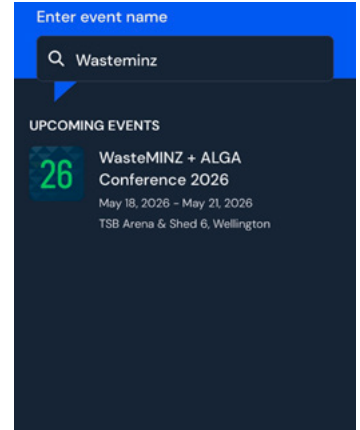

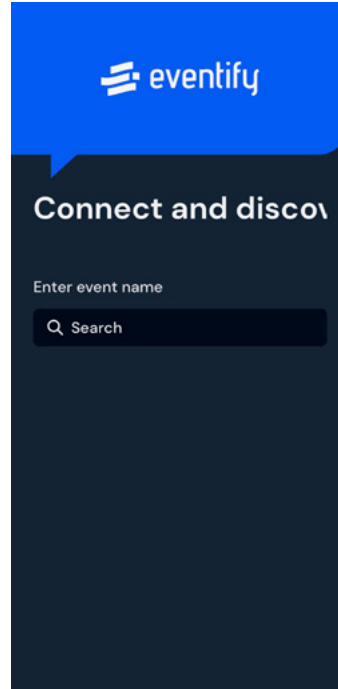

WIFI

Network: **VenuesWellington_Free**

Password: **no password required**

A pop-up window will appear in your browser with a prompt to accept the relevant "Terms/Conditions". Acceptance will grant the user access to the complimentary WiFi.

Jo Ferry | Sector Director - Water +
Resource Recovery
jferry@tonkintaylor.co.nz
+64 9 359 2773
SITE 25, 32, 33

Tonkin + Taylor is proud to support the 2026 WasteMINZ ALGA Conference. Together we deliver leading waste, resource recovery, and contaminated land solutions across Aotearoa, Australia, and the Pacific. We believe the best solutions come through collaboration with our clients and communities, and that together we can achieve resilient and sustainable outcomes.

SILVER + CLM WORKSHOP & TAO FORUM NETWORKING EVENT SPONSOR

HILL LABS
hill-labs.co.nz
Jane Sherrard
jane.sherrard@hill-labs.co.nz
+64 27 478 6017
SITE 39

Founded in 1984 by Dr Roger and Anne Hill, Hill Labs has grown to become New Zealand's largest, privately-owned analytical laboratory. We use the latest technologies to supply a broad range of laboratory tests to domestic and international markets: environmental, agriculture and food and bioanalytical.

SILVER + COFFEE CART SPONSOR

EUROFINS ENVIRONMENT TESTING
eurofins.co.nz
Tim Meikle | Business Unit Manager
tim.meikle@eurofinsanz.com
+64 21 997 958
SITE 20

Eurofins delivers world-leading environmental testing through a network of nine local laboratories, combining a strong national presence with global capability. IANZ-accredited to ISO/IEC 17025, we provide advanced analysis of water, soil, air and waste, including PFAS, microplastics, asbestos, methamphetamine, and a wide range of organic and inorganic contaminants.

SILVER SPONSORS

ALS ENVIRONMENTAL NZ
alsglobal.com
Prianshu Chawla | Business
Development Officer
prianshu.chawla@alsglobal.com
+64 21 961 945
SITE 10

Discover ALS Environmental NZ. We provide a full range of environmental analytical testing services, specialising in the analysis of soil, sediment, water, leachates, and industrial hygiene. With locations nationwide including Hamilton, Hawke's Bay and Christchurch, ALS complies with international standards such as ISO/IEC 17025/IANZ to provide accurate and reliable results to clients in a timely manner

ECOBATT
ecobattnz.com
Spyro Kalos | National Partnerships
Manager ANZ
spyro.kalos@ecocycle.com.au
+61 439 195 378
SITE 24

EcoBatt is leading sustainable battery recycling in New Zealand. We safely collect, transport, and recycle all battery types from household to industrial, BESS, e-mobility, and EV. With a focus on innovation, safety, and environmental protection, EcoBatt delivers responsible recycling today, helping create a cleaner, greener future for all.

BRONZE + LANYARD SPONSOR

ECOCENTRAL
ecocentral.co.nz
Brandon Craine | Commercial
Manager
brandon.craine@ecocentral.co.nz
+64 27 278 5440

EcoCentral is paving the way to encourage responsible waste management through our three operations, all of which focus on waste reduction, reuse, resource recovery, and responsible disposal methods. EcoCentral's vision is an economically sustainable circular economy for New Zealand in which EcoCentral plays a leadership role.

BRONZE SPONSORS

GHD
ghd.com/en-nz
Stephen Douglass | Market Leader – Environment
stephen.douglass@ghd.com
+64 29 374 8517

GHD is proud to sponsor WasteMINZ ALGA Conference 2026. As a global professional services business, we deliver impactful infrastructure solutions across water, transport, energy, environment and property and buildings. With over 600 people across Aotearoa New Zealand, supported by more than 5,000 across Asia Pacific and 11,000 globally, we're united by a shared purpose – to create positive, sustainable outcomes and build lasting partnerships that make a real difference.

STANTEC NEW ZEALAND
stantec.com
Tess Brothersen | Principal Environmental Scientist
tess.brothersen@stantec.com
+64 27 453 9527

Stantec is a global leader in sustainable engineering, architecture, and environmental consulting. The diverse perspectives of our partners and interested parties drive us to think beyond what's previously been done on critical issues like climate change, digital transformation, and future-proofing our cities and infrastructure. We are designers, engineers, scientists, project managers, and strategic advisors. We innovate at the intersection of community, creativity, and client relationships to advance communities everywhere, so that together we can redefine what's possible.

GALA DINNER SPONSOR

SLR
slrconsulting.com
Nigel Mather | Environmental Services Team Manager
nigel.mather@slrconsulting.com
+64 21 612 799

SLR is a global leader in full spectrum sustainability solutions: providing clients with strategic advice and on the ground technical support, partnering with them in making sustainability happen. Founded in 1994, we have over 20 years' experience in sustainability from a network of offices in Asia Pacific, Africa, Canada, Europe, Latin America and the US.

CONFERENCE APP SPONSOR

WASTECO
wasteco.co.nz
Jaz Jory | South Island Sales Manager
jaz.jory@wasteco.co.nz
+64 27 825 8837

WasteCo is proud to sponsor the conference app, reflecting our commitment to landfill diversion and cleaner environments. As a national leader in waste management with strong local roots, we invest in innovative sorting technologies and community-driven solutions to repurpose waste—shaping a more sustainable and resilient future for Aotearoa.

LOUNGE SPONSOR

FOODSTUFFS NZ
foodstuffs.co.nz (North Island)
foodstuffs-si.co.nz (South Island)
Sandy Botterill | Head of Environmental Social Governance
sandy.botterill@foodstuffs.co.nz
+64 27 535 3298

Foodstuffs is made up of two 100% New Zealand-owned co-operatives, best known for our brands Four Square, New World, and PAK'nSAVE. As local grocers, we're passionate about creating a positive impact in the communities we serve across Aotearoa. Our sponsorship of the WasteMINZ ALGA Conference reflects our commitment to the environment and the power of collaboration. We believe that the future lies in viewing materials not as waste, but as valuable resources. By working together—sharing knowledge, building partnerships, and driving innovation—we can unlock opportunities to keep resources in use for longer and create circular solutions that benefit everyone. Together, we can create solutions that deliver value for our people, our communities, and the environment.

AWARDS FOR EXCELLENCE SPONSOR

RE.GROUP
re-group.com
Daniel Yallop | Business Development
Manager
daniel.yallop@re-group.com
+64 21 0295 9060

By way of background, Re.Group is the only company that designs, builds, owns and operates recycling facilities and systems in Australasia. We are delivering our vision of a wasteless society by operating the largest network of recycling facilities across the continent. We recycle 500,000 tonnes of materials and over 1.5 billion used beverage containers annually. Re.Group processes kerbside recycling from more than 5 million people across 40 government areas and services thousands of customers, with more than 100 million refunds paid out each month. Re.Group have been working in partnership with Auckland Council since July 2024 regarding the operation of the Onehunga Materials Recovery Facility, which processes all of Auckland's household recyclables (material in your yellow lidded bin), handling 115,000 tonnes of material every year.

COFFEE CART SPONSOR

TOMRA
tomra.com/en
Jonathan Marshall | Business
Development Manager
jonathan.marshall@tomra.com
+64 21 728 671
SITE 19

TOMRA is proud to be at WasteMINZ ALGA Conference 2026 and to be sponsoring the conference coffee cart. TOMRA is the world's largest supplier of RVM technology in support of container deposit and reuseable cup schemes and is actively supporting the introduction of these schemes into Aotearoa New Zealand. Globally TOMRA reverse vending machines capture over 50 billion used containers annually for recycling and reuse.

CONTAMINATED LAND MANAGEMENT WORKSHOP SPONSOR

BECA
beca.com
Phillip Ware | Beca Technical Fellow-
Contaminated Land
Phillip.Ware@beca.com
+64 9 336 9431

Beca is a leading Australasian engineering and environmental consultancy. Our 30 strong contaminated land specialist team across New Zealand and Australia deliver end to end solutions: site investigations, risk assessment, remediation design and oversight, due diligence, and long term monitoring - enabling sustainable land development, de-risking decisions, and accelerating project delivery with practical, proven expertise for clients.

WOMEN IN THE INDUSTRY BREAKFAST SESSION SPONSOR

ENGEO
engeo.co.nz
Erika McDonald | NZ General
Manager, Principal Environmental
Engineer
emcdonald@engeo.co.nz
+64 21 628 764

ENGEO is proud to support the WasteMINZ ALGA Conference 2026. We work with councils and industry to manage ground and environmental risk, offering expertise in contaminated land, remediation advice, hazardous materials management, geotechnical engineering and water resources. Our multidisciplinary New Zealand team delivers practical, fit for purpose solutions backed by international specialists.

NETWORKING EVENT SPONSOR

WINSTONE WALLBOARDS
gib.co.nz
Anne Pezaro | Sustainability
Manager
sustainability@gib.co.nz
+64 27 202 4275

For nearly a century, Winstone Wallboards has designed and manufactured high quality GIB® plasterboards in New Zealand enabling our construction industry to plan, design, and build safe and durable buildings with beautiful interiors. As New Zealand's only plasterboard manufacturer, we take our stewardship role seriously. We see embedding environmental sustainability into New Zealand's plasterboard value-chain not only as a commitment, but as a responsibility. From material sourcing and manufacturing to end of life solutions, by working with councils and aligned industry partners, we are designing solutions for more circular pathways for plasterboard - providing better outcomes for our planet, our buildings, and our people. Together, we can build a better New Zealand.

OPENING KEYNOTE SPONSOR

REPAIR NETWORK AOTEAROA
repairnetworkaotearoa.org.nz
Brigitte Sistig | CEO
brigitte.sistig@
repairnetworkaotearoa.org.nz
+64 21 113 4171

Repair Network Aotearoa leads the repair movement in Aotearoa. Guided by Te Tiriti o Waitangi obligations, we look beyond the circular economy to strengthen community resilience, advocating for durable product design and repair access. Through grassroots events and skill-sharing, we empower businesses and communities to build an equitable, waste-free future.

SESSION SPONSOR

ENVITECH
earthtech.co.nz
Lindsay Strachan | Senior Engineer
lindsay.strachan@earthtech.co.nz
+64 21 0250 9386

Envitech Projects is a specialist engineering consulting firm, focusing on green and ground engineering. We pride ourselves in delivering projects for our clients, incorporating sustainability into engineering design to benefit the environment – reducing environmental impact effects, promoting resource efficiency & economic circularity, and protecting human health & safety. Current key example projects involve a new steel smelter for the production of steel from recovered & recycled end-of-life vehicles, treatment of landfill leachate contaminated ground and rehabilitation of legacy landfill sites, and building developments with green engineering focus.

WINE FOR SPEAKER GIFTS + BEER NETWORKING EVENT SPONSOR

LION NEW ZEALAND
lionco.com
Sara Tucker | Corporate Affairs
Director
sara.tucker@lionco.com
+64 27 450 1945

LION is a leading beverages company with brands that have been shaping the way people come together, connect and celebrate for over 100 years. We're proud to be Australasia's first large-scale certified carbon zero beverages company and a B Corporation. We are on a mission to not only be a force for growth but a force for good, and we are focused on supporting a thriving circular economy through our sustainable packaging strategy.

keynote speakers

HELMUT KAREWA MODLIK

Tumu Whakarae - CEO

Helmut is an experienced director, executive, and consultant with extensive experience across the private and public sector and with specialist skills in business and economic development, strategic planning, change management, and finance. Helmut's work over the last 20 years has focused on chief executive leadership of private sector company mergers, turnarounds, and business improvements. Since 2020 Helmut has been CEO of Te Rūnanga o Toa Rangatira, with executive and governance responsibilities across a broad range of social and commercial enterprises.

TUESDAY 19 MAY

He waka e noa: We are all in this together!

When the Tainui waka arrived in Aotearoa 900 years ago, those aboard found an environment dramatically different to their tropical homeland. Their response was to change themselves, their habits, and practices to feed, clothe, and house themselves to live sustainably. 700 years later others arrived with a different philosophy that led them to cut, burn, dig, and build, changing what they found to fit themselves. We still live with the legacy of those opposing approaches to life in these beautiful islands.

Albert Einstein said, "we cannot solve our problems with the same thinking we used when we created them". Stephen Covey championed the transformative power of open minds and hearts to receiving insights that can change paradigms and enable radically improved outcomes.

Ngāti Toa Rangatira CEO Helmut Modlik contends that indigenous tikanga-based thinking and western technology-dominated approaches need not be in opposition but can complement each other for enhanced outcomes. He will offer insights enabling a paradigm shift in the way we think about the waste and resource recovery industry and how we can work together as "kaitiaki" or stewards to leave a legacy of outcomes that our grandchildren will bless us for.

keynote speakers

DR MAI CHEN

Dr Mai Chen (LLB (Hons) (Otago), (LLM (Harvard), HonLLD (Otago), CMIInstD), is a top barrister in NZ and President of NZ Asian Lawyers. She was previously:

- Managing Partner, Chen Palmer Public and Employment Law Specialists
- Independent non-executive Director, Bank of New Zealand Board and chair of the People and Remuneration Committee
- Member of the New Zealand Securities Commission
- Adjunct Professor at the University of Auckland Business School and Law School
- Inaugural Chair of NZ Global Women
- Top 10 finalist, 2014 and 2016 New Zealander of the Year
- Top 50 Diversity Figures in Public Life, Global Diversity List supported by The Economist

Mai has advised on the regulation and legislation concerning waste minimisation and the RMA for many years.

TUESDAY 19 MAY

How to succeed when laws keep changing affecting waste: How do you best position your self/entity and be effective?

In this keynote, Mai will explore how organisations can stay effective and strategically positioned amid constant legislative change in the waste and environmental sectors. She will unpack the fast moving landscape of law reform - from ongoing updates to the Natural Environment and Planning Bills to the evolving Fast-track Approvals Act and upcoming amendments to the Waste Minimisation and Litter Acts. Mai will discuss what can realistically be expected before Parliament rises prior to the election later this year, and what those timelines mean for planning and compliance. She will also explain how best to lobby for the policy and law changes you want – and do not want.

Beyond understanding what's changing, Mai will focus on how to operate proactively: staying informed through key government updates, recognising critical reform milestones, and identifying where influence can still be applied before decisions are finalised. Attendees will gain insights into how to position their organisations effectively in the face of overlapping reforms across environmental regulation, planning frameworks, and local government – ensuring they're not only prepared for new legislation but able to help shape it before it's too late.

keynote speakers

HON NICOLA GRIGG

Nicola Grigg is the Minister for the Environment, Minister of State for Trade, Minister for Women, and Associate Minister for ACC. Nicola has been the MP for Selwyn since 2020.

Nicola was born and raised on the family sheep and beef farm in Mt Somers, and studied at the New Zealand Broadcasting School, graduating with a Degree in Broadcast Communications and Diplomas in Television and Radio News.

Nicola has worked as a reporter and newsreader and with a wide range of agri-businesses in export marketing and business development.

WEDNESDAY 20 MAY

Hon. Nicola Grigg, Minister for the Environment

BERNARD HICKEY

Bernard Hickey is a financial and political commentator who produces two daily podcasts and newsletters about Aotearoa's political economy and global finance. He has covered politics and economics for 35 years from Auckland, Wellington, Canberra, Sydney, London, Singapore and New York, as well as co-founded online news publishing businesses, including Newsroom, Interest.co.nz and The Kaka.

WEDNESDAY 20 MAY

NZ's political economy in a world of wars, climate change and elections

Independent commentator Bernard Hickey will present on how New Zealand's political economy is coping with existential challenges in the global economy, geopolitics and from climate change. With just months until the election, change and opportunity abound – for some.

keynote speakers

DR NICK KIM

Dr Nick Kim is a Senior Lecturer in Applied Environmental Chemistry at Massey University's School of Health Sciences in Wellington, New Zealand, where he oversees environmental health programmes, teaches topics in toxicology, environmental monitoring and risk assessment, and supervises postgraduate research. Holding a first-class BSc(Hons) and PhD in Environmental Chemistry from the University of Canterbury, he has over three decades of experience bridging applied environmental chemistry, human health risk assessment and natural resource management. His career includes 11 years lecturing at the University of Waikato, a decade as Science Advisor at Waikato Regional Council (where he led contaminated site investigations, regional air/soil/water monitoring and made contributions to national standards such as the NES for Contaminants in Soil), and 13 years at Massey, together with a six-month secondment as Senior Policy Advisor at the Ministry for Primary Industries. Dr Kim has provided technical support for a wide range of government initiatives, acted as an independent hearings commissioner under the RMA, and contributed to reviews of methamphetamine testing practices, ecological soil guideline values, and chemical regulation in Aotearoa. In his keynote he will draw on this practical and policy experience to examine the transition in New Zealand's environmental limits under the reformed resource management framework, highlighting the inevitable interplay of science, policy choices, community values and practical compromises.

WEDNESDAY 20 MAY

Environmental limits in transition: Science, policy, and community aspirations in New Zealand's new resource management framework

In this talk Nick will explore the major shift in New Zealand's environmental management framework, focusing on Resource Management Act reforms and what they mean for setting environmental limits. He will explain why the idea of purely 'science-based' limits is misleading—standards are always shaped by policy choices, human values, and practical compromises, even when informed by science. The presentation will look at different ways limits are set, from precautionary to risk-based approaches, and how the new system will place greater emphasis on 'balanced judgement' by councils to reflect community aspirations. Nick will also examine the range of possible purposes for soil limits, and illustrate some concepts with case studies on methamphetamine (purpose creep), arsenic in drinking-water (policy compromise), and fluorine in soils (problem definition). Future environmental limits will be set following a central government methodology. The talk concludes by arguing for a transparent, problem-led process that integrates scientific information with community priorities to achieve environmental protection that is both effective and socially legitimate.

keynote speakers

GEOFF COOPER

Geoff is the Chief Executive of Te Waihanga, the New Zealand Infrastructure Commission. Prior to this, he's worked at the United States Federal Reserve and is a former Chief Economist at both PwC and Auckland Council. He holds a Master of Economics with First Class Honours from the University of Auckland and a Master of Public Affairs from Princeton University.

THURSDAY 21 MAY

National Infrastructure Plan

Geoff will discuss the National Infrastructure Plan that was published in December last year. The Plan sets out a practical, affordable pathway to deliver the infrastructure New Zealanders need to thrive over the next 30 years. It identifies 16 recommendations across four areas where New Zealand needs to lift performance and highlights 10 priorities for the decade ahead.

mc

NICOLA TURNER

Nicola Turner is a speaker, best-selling author and the driving force behind Mainstream Green. After 15 years in the global consumer goods industry—where she learnt far too much about how we all behave in the supermarket—she shifted gears. Now, she's on a mission to rethink consumption and make sustainability easy, normal, and feel good. Drawing on her deep understanding of human behaviour and real-world sustainability experience, Nic empowers individuals, organisations, and communities to embrace sustainability in a way that works for them. In practical and doable ways, she inspires action that creates meaningful change.

panel discussions

TUESDAY 19 MAY
7.00-8.15

Women in the Industry

TUESDAY 19 MAY
11.00-12.30

Reclaiming resources: Optimising soil reuse

TUESDAY 19 MAY
13.30-15.00

Kerbside services under pressure - costs, contamination and competing expectations

TUESDAY 19 MAY
13.30-15.00

Retail sector challenges

TUESDAY 19 MAY
15.30-16.30

Political panel

WEDNESDAY 20 MAY
8.30-10.30

Drawing lines in the land: Limits, targets, interventions

WEDNESDAY 20 MAY
13.30-15.00

Building disaster waste systems before the next event

THURSDAY 21 MAY
9.00-10.30

What do we want the sector to look like in the future and how do we get there?

THURSDAY 21 MAY
11.00-12.30

Mātauranga informing future management of waste and contaminants

collaborative session discussion tables

WEDNESDAY 20 MAY
15.30-16.30

The discussion tables will cover the following topics:

- Strengthening waste licensing through cross sector collaboration
 - Beyond recovery: Reflections on scaling the repair economy in Aotearoa
 - Technical Guidelines for Disposal to Land
 - How could government policy support the move from waste management to resource recovery?
-

CLM WORKSHOP: GROUNDWATER AND CONTAMINANT TRANSPORT DYNAMICS FOR CONTAMINATED LAND PROFESSIONALS

9.30-10.00 **REGISTRATION & COFFEE**

ROOM 1+2

10.00-10.15 **Simon Hunt** *EHS Support New Zealand*

Welcome and orientation

10.15-10.30 **Simon Hunt** *EHS Support New Zealand*, **Kim Wepasnick** *Toitu Te Whenua | Land Information New Zealand* & **Katy Grant** *Pattle Delamore Partners*

Case study overview

Introduction to the three case studies:

- Case Study A: Hanmer Springs Forest Camp (Jollies Pass Road)
- Case Study B: Horopito / Former motor wrecker site (railway land)
- Case Study C: Avondale (Auckland) development site – Kāinga Ora

Note: Each session will reference these case studies as practical examples and discussion/reference points.

10.30-11.30 **Bridget Derham** *Fulton Hogan*, **Isaac Hardy-Ward** *Tonkin + Taylor*, **Kevin Tearney** *SLR Consulting*, **Sarah Schiess** *Tonkin + Taylor*, **Simon Hunt** *EHS Support New Zealand* & **Stephanie Dijkstra** *WSP*

Groundwater contamination dynamics & Conceptual Site Models (CSMs)

- Understanding contamination dynamics
- Receptor issues
- Developing and applying CSMs (physical and chemical)
- Table discussion: Describe the CSM for each case study

11.30-12.00 **Samantha Iles** *SLR Consulting*, **Lisa Scott** *Environment Canterbury* & **Stephanie Dijkstra** *WSP*

Setting the scene: Regulatory and commercial drivers & NZ context

- Overview of key regulations and guidance documents
- Cross boundary liability/responsibility

12.00-12.45 **LUNCH**

12.45-13.30 **Stephanie Dijkstra** *WSP* & **Simon Hunt** *EHS Support New Zealand*

Setting the scene: Regulatory and commercial drivers & NZ context - continued

- Te Ao Māori and indigenous perspectives on groundwater - covering cultural perspectives, mahinga kai considerations, integrating cultural values into conceptual site models
- Table discussion: How does the regulatory, commercial and NZ context apply to case studies A, B, and C

13.30-14.45 **Katy Grant** *Pattle Delamore Partners*, **Sarah Schiess** *Tonkin + Taylor* & **Simon Hunt** *EHS Support New Zealand*

Investigation, assessment & management strategies

- Investigation techniques
- Assessment approaches

14.45-15.15 **AFTERNOON TEA**

15.15-16.00 **Katy Grant** *Pattle Delamore Partners*, **Sarah Schiess** *Tonkin + Taylor* & **Simon Hunt** *EHS Support New Zealand*

Investigation, assessment & management strategies - continued

- Management strategies
- Table discussion: Apply investigation, assessment, and management strategies to case studies A, B, and C through discussion and short exercises

16.00-16.45 **Kevin Tearney** *SLR Consulting*, **Kim Wepasnick** *Toitu Te Whenua | Land Information New Zealand* & **Simon Hunt** *EHS Support New Zealand*

Reporting and lessons learned

- Reporting (good versus poor practice)
- Key elements of effective reporting
- Regulatory compliance and communication
- Table discussion: Lessons learned and reference back to case studies A, B, and C

16.45-17.00 **Simon Hunt** *EHS Support New Zealand*

Closing

- Assessment and modelling tools
- Guidance documents and references available

from 17.30 **NETWORKING DRINKS | OFF SITE**

DAY 1 MONDAY 18 MAY

EMERGING CONTAMINATED LAND MANAGEMENT AND GROUNDWATER PROFESSIONALS WORKSHOP

This interactive workshop is designed for early career professionals, providing practical exposure to contaminated land and groundwater practice. The workshop combines regulatory context, field and laboratory fundamentals, and essential professional development skills. The Emerging Contaminated Land Management and Groundwater Professionals Workshop runs in parallel with the CLM Workshop and is tailored for professionals with approximately 0 to 3 years' industry experience. Sessions focus on building foundational knowledge, practical understanding, and professional confidence.

12.30 REGISTRATION

13.00-13.45 **Michelle Begbie** *Waikato Regional Council* & **Rachel Rait** *Department of Conservation*

Session 1: Regulatory and industry fundamentals

Understanding the framework you work within

This session provides a clear, high-level overview of the regulatory landscape governing contaminated land and groundwater work, and how guidance and policy translate into day-to-day practice.

Key themes include:

- Regulatory drivers and industry expectations
- How guidance is applied across projects
- Linking policy, guidance, and site-based decision making
- Understanding roles and responsibilities early in your career

13.45-16.00 **Session 2: From field screening to data use**

Session Moderator: **Kim Harrison** *Hill Labs*

13.45-14.05 **Mike Young** *Verum Group*

Session 2 - Part 1: Sampling intelligently, field screening with XRF

Things to think about when planning your sampling and an introduction to the use of XRF, covering:

- What is XRF
- What it can and cannot tell you
- Appropriate applications and limitations

14.05-14.25 **Graham Corban** *Hill Labs*

Session 2 - Part 2: How a lab works, from field sample to final result

This session demystifies laboratory processes by following soil samples from receipt to reported results, with a focus on:

- How soils are registered, sub sampled and prepared for metals and organics analysis
- How assumptions vs what the lab actually does affects the conclusions of the investigation
- Why a bit more investigation up front could be a good idea for some projects

14.25-14.45 **Graham Corban** *Hill Labs*

Session 2 - Part 3: Helping the lab to help you, setting your samples up for success

A practical look at how field and project decisions affect laboratory outcomes, including:

- Sample submission, handling and preparation factors that drive data quality
- The importance of making sure that what the lab gives you will meet your data quality objectives
- Giving the lab information that may affect the analysis

14.45-15.15 AFTERNOON TEA

15.15-15.40 **Prianshu Chawla** *ALS Environmental NZ*

Session 2 - Part 4: Getting the most from your laboratory provider: Assuring defensible decisions in water testing

In this session we will step through laboratory analysis with a QA/QC focus, covering:

- QA/QC principles
- Common data quality issues and checks
- How water samples are analysed in laboratories

15.40-16.00 **Kimberley Saflian** *ESdat*

Session 2 - Part 5: Data reporting and results use

Understanding laboratory reports, key qualifiers, and presenting results to support decision making.

This session will focus on how laboratory data is reported and applied, including:

- Understanding the lab report data review and QA/QC process
- Presenting results clearly for decision making
- Tips and tricks for data management

16.00-17.00 **Craig Cowper** *Alliance*

Networking, career development and communication skills

Building your professional foundation

This interactive session focuses on the professional skills that underpin long term career success, with practical guidance tailored to early career professionals.

Key themes include:

- Practical networking strategies for industry events
- Building confidence and professional presence
- Presentation and communication fundamentals
- Career pathways and development insights
- Short participant presentations and facilitated discussion

from 17.30 NETWORKING DRINKS | OFF SITE

sponsored by  Hill Labs

DAY 2 TUESDAY 19 MAY

7.00-8.30 REGISTRATION | EXPO HALL

\\ SESSION ONE

ROOM 1

7.00-8.15 WOMEN IN THE INDUSTRY BREAKFAST

PANEL DISCUSSION

Women in the industry

Panellists: **Kate Butterfield** *Southbase*, **Jasmine Faulkner** *Phoenix Recycling*, **Samantha Iles** *SLR Consulting New Zealand*,

Kim Wepasnick *Toitu Te Whenua | Land Information New Zealand* & **Erika McDonald** *ENGEO*

Facilitator: **Nic Quilty** *WasteMINZ*

sponsored by  **ENGEO**
CELEBRATING 15 YEARS
OF ENGINEERING EXCELLENCE

PLENARY ROOM

8.30-10.30 **MIHI WHAKATAU & OPENING PLENARY**

The Mihi Whakatau will be led by Ali Houpapa and Kurt Komene from Taranaki Whānui

WELCOME **Parul Sood** *WasteMINZ Chair* & **Brendon Love** *ALGA Board Director*

KEYNOTE **Helmut Modlik** *Te Rūnanga o Toa Rangatira* He waka e noa: We are all in this together!

KEYNOTE **Dr Mai Chen** How to succeed when laws keep changing affecting waste:

How do you best position your self/entity and be effective?

sponsored by  **REPAIR**

	<p>Justine Haves <i>Auckland Council & Sarah Nicholls</i> <i>Zero Waste Tāmaki Makaurau Trust</i></p> <p>From contracts to collective impact: Establishing the Zero Waste Tāmaki Makaurau Trust</p>	<p>PANEL DISCUSSION</p> <p>What do we want the sector to look like in the future and how do we get there?</p> <p>Panellists: Angela Atkins <i>Hastings District Council</i>, Paul Evans <i>Localised</i>, Sunshine Yates <i>Sunshine Yates Consulting</i>, Hannah Blumhardt <i>Reuse Aotearoa & Laurence Dolan</i> <i>Enviro NZ</i></p> <p>Facilitator: Rosie Dawson-Hewes <i>3R Group</i></p>	<p>Kristy Jones <i>Cook Brothers Construction</i></p> <p>Building smarter, wasting less – insights from a construction waste case study</p>	<p>Gina Harris <i>ERIAS</i></p> <p>Samples to strategy: Navigating research and an early career in a post-COVID world</p>	<p>Jess Campbell & Isobel Stout <i>Pattle Delamore Partners</i></p> <p>Development of site-specific trigger values for the treatment and re-use of PFAS contaminated soils</p>
	<p>Niamh McShane <i>SLR Consulting & Maggie Leath</i> <i>Stantec</i></p> <p>Flying blind on fly tipping: Revealing Aotearoa's unmeasured dumping risk – a Waimakariri River case study</p>		<p>Emily Newmarch <i>Warren and Mahoney & Ben Cannon</i> <i>LT McGuinness</i></p> <p>Design, delivery and waste: What a hybrid mass timber product taught us</p>	<p>Anton Bernasconi <i>Tonkin + Taylor</i></p> <p>Tackling the too hard basket</p>	<p>Jack Hammond <i>ENGEO</i></p> <p>Don't dig yourself a hole: Why soil management frameworks matter</p>

DAY 4 THURSDAY 21 MAY

	PLENARY ROOM	ROOM 1	ROOM 2	ROOM 3	ROOM 4
	<p>Anita Lewis <i>Waikato Regional Council</i></p> <p>Microplastics in Aotearoa's marine environment: Emerging risks, knowledge gaps, and strategic interventions</p> <hr/> <p>Geoff Gibson <i>Hastings District & Napier City Councils</i></p> <p>It's not my problem - where construction waste responsibility falls through the cracks</p>			<p>Brodie Rowse <i>Beca</i></p> <p>Contaminated land - a regional New Zealand perspective</p>	<p>Jo Cavanagh <i>New Zealand Institute for Bioeconomy Science</i></p> <p>Realising the value of urban soils</p>
10.30-11.00	MORNING TEA EXPO HALL				
\\ SESSION TWO					
	PLENARY ROOM				
11.00-12.30	<p>CLOSING PLENARY</p> <p>KEYNOTE Geoff Cooper <i>New Zealand Infrastructure Commission</i></p> <p>National Infrastructure Plan</p> <hr/> <p>PANEL DISCUSSION</p> <p>Mātauranga informing future management of waste and contaminants</p> <p>Panellists: Lee Rahina-August <i>Ahumai</i>, Aimee Bishop <i>Te Rūnanga o Toa Rangatira</i> & other panellists TBC</p> <p>Facilitator: Stephanie Dijkstra <i>WSP</i></p> <hr/> <p>CLOSING WORDS Nic Quilty <i>Chief Executive WasteMINZ</i> & Matt Potter <i>Chief Executive ALGA</i></p>				
12.30-13.30	FAREWELL LUNCH SHED 6 ARCADE				
13.00-17.00	SITE VISITS for those who have registered for them				

site visits

We are offering two site visits to choose from at the end of the main conference programme. These will both be held at the same time, after sessions finish on Thursday, 21 May - leaving from the venue at 1pm and returning back to the venue at approximately 5pm. A packed lunch will be provided to all participants.

OPTION 1

Southern Landfill

Join Wellington City Council staff on a tour of the Southern Landfill site, where experts will talk you through the operations and the development of the full landfill site including:

- Tip shop and recycle centre
- Transfer station
- Compost plant
- Dewatering plant
- Closed landfill sites
- and much more.

The tour gives a history of waste operations at the Southern Landfill, looks at the volume and types of waste being sent to landfill, the environmental monitoring onsite, and the future of the Southern Landfill.

The bus will drive around this location from point to point, so limited walking required – however closed shoes are necessary.

Many of you have heard about the Southern Landfill Extension Project with the unique piggyback design, although this will not necessarily be visible, questions may be answered!

The bus will return to the TSB Arena via the airport, for those who need to catch a flight.

OPTION 2

EarthStarch Organic Solutions & Silverstream Landfill

EarthSOS - Come and meet Rosie

Discover EarthSOS's decentralised, scalable organic processing solution (Rosie) designed for communities, councils, and businesses.

Join the EarthSOS team for a site tour where you'll see Rosie in action. This smart, fast, and odour-free process transforms food scraps and other organic waste materials into rich organic soil conditioner in under 4 hours.

It's the future of organic waste processing and the EarthSOS team can't wait to show you how it works!

Silverstream Landfill

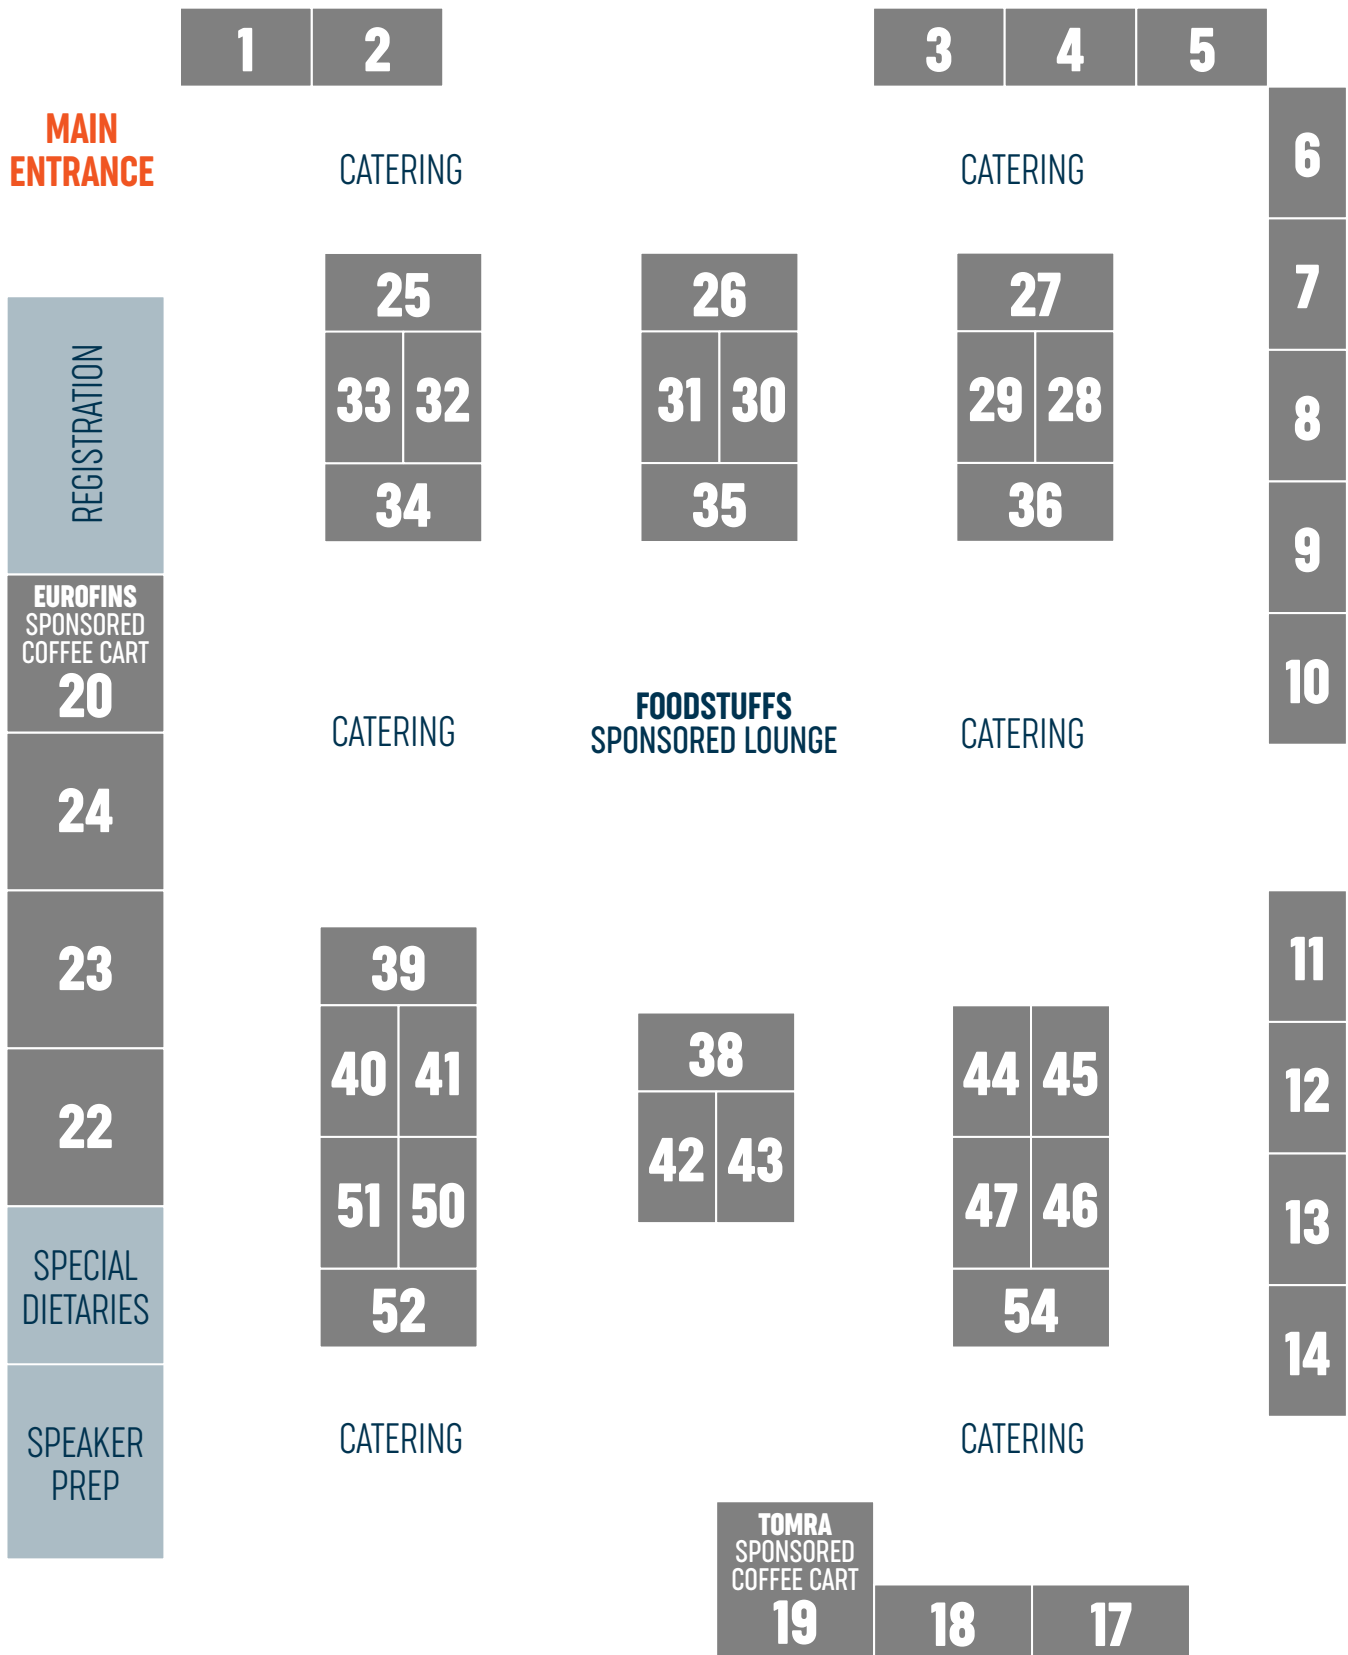

This field trip will visit EDL's pilot asbestos destruction plant located at the Silverstream Landfill in Wellington.

With many locations in New Zealand and around the world facing ongoing asbestos disposal challenges, this visit will showcase a cutting-edge mechanochemical technology that renders asbestos in legacy materials inert, producing a fine powder suitable for reuse in concrete applications and other industrial uses.

EDL representatives will be onsite to explain the process, demonstrate the equipment, and discuss how this pilot facility is paving the way toward a world-leading solution for asbestos treatment.
