Follow up from Waste and Recycling Data Survey

Thanks you for completing the Waste and Recycling Data Survey recently and for indicating you are happy to provide some data so we can work out some baseline figures for several aspects.

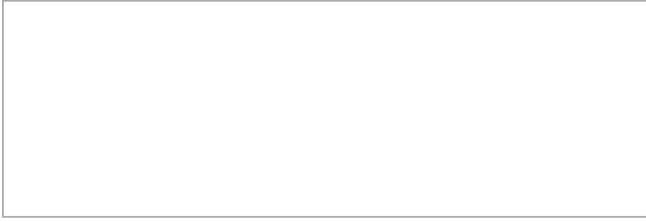

For each of the following please provide me with the latest data noting the time period this covers.

Just put NA for any question you don't have data on.

Latest tonnage of kerbside rubbish to landfill from council provided services

Latest tonnage of kerbside rubbish to landfill

Latest data on composition of rubbish to landfill

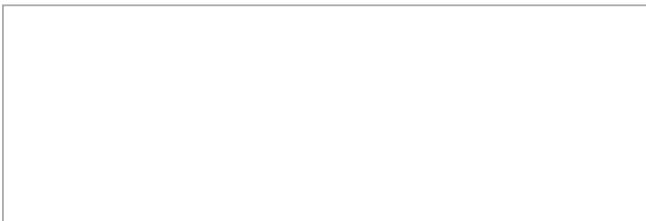

Latest tonnage of kerbside recycling collected

Latest data on the composition of kerbside recycling, in terms of, for example, paper, glass, #1 plastic, #2 plastic, aluminium cans etc.

Latest data on the percentage and/or tonnage of material that is collected from kerbside recycling that is subsequently disposed of to landfill by the processor

Thanks very much, again!
